ETHOS

I'm a Frontend Developer and designer, I solve complex problems using a process of elimination and a creative flair.

There's never been a more interesting and challenging time to be a developer, the need for virtual communication is more inherent than ever with COVID-19 changing the way we have previously worked.

More companies are turning to digital communication and remote working to continue to power their business. It's my job to be a problem solver and figure out how to fill the gaps in communication between both the employees and the customers.

'STACK' AND SKILLS

Web Accessibility WCAG 2.1 & WAI-ARIA 1.1
Html, Css
JavaScript
React
JQuery
Node Js
Sass & Less
Bootstrap
Gatsby Js
Ux/Ui Research

Illustrator and Photoshop
Premiere Pro and After Effects
SEO best practice

A LITTLE ABOUT ME

London marathon time - 4:12
Fanatical about snowboarding
Previous Ski rep with 'Nuco snowsports'
Guitar player (Gibson Les Paul)
NFL team - Seahawks
Favourite book - "This is going to hurt" by Adam Kay

CONTRACT FRONTEND DEVELOPER AND DESIGNER
Weverdat Limited | Jan 2021 - Sep 2021 contractor

Responsible for the betting and gaming company's frontend design and development, including websites, portals, web applications and web software. Working with a mixture of APIs and Websockets to build and integrate any worldwide live cricket games data into smart, accessible and intuitive customer-facing applications. This project was particularly hands-on with regards to assessing, planning and designing with Javascript and React.

FREELANCE FRONTEND DEVELOPER AND DESIGNER
Salesimpact Academy | Sep 2020 - Dec 2020 contractor

Managing, designing and developing the re-branding, upscaling and migration of salesimpact.io from the companies legacy branding and website on Wix, to WordPress CMS in under six weeks with a new Ux and Ui. Creating a rebranded design in Adobe XD before building with WordPress (Html, CSS, javascript and Php) to add extra functionality outside the norms of WordPress giving the site a truly unique and custom feel. Using Adobe Creative Suite to support the creation of graphics for the site. Managing a seamless switch of re-branding and ensuring no downtime to the company online presents or e-learning platform for customers. Contributing to communications and marketing by building Html emails and putting forward new ideas to build web traffic and better UX for the site.

WEB ACCESSIBILITIES CONSULTANT AND DEVELOPER
VisitBritain.org | Feb 2020 - Sep 2020 - contractor

Managing an accessibilities 'audit and fix' project for Visit Britains web portfolio, applications and associated web content at www.visitbritain.org. Creating an initial audit of failures and areas of improvement to be used as a basis of a project timeline to report to the head of Communications and assuring the highest quality of accessibility standards. Create and manipulate VisitBritain's website and associated web documents to comply with an AA standard in accordance with the WCAG 2.1 and WAI-ARIA 1.1 frameworks as laid out by the W3C. Manipulating web content with HTML, CSS, JavaScript, jQuery, React and Adobe Creative suites. Worked intuitively to solve accessibility issues allowing users of any ability to access Visit Britians content. Creating a legacy of accessible standards by guiding the team to future-proof additional content to compile with accessibility guidelines.

FRONTEND CONTENT AND WEB DEVELOPER
VisualSkies | Jun 2016 - 2020 - Permanent

Working with the company to build its digital landscape from the ground up by creating digital content and a mobile-first design. This meant designing a brand new UX/UI and building the site using HTML, CSS, PHP vanilla javascript, React and jQuery for functionality.
